

ANNMARIA JIMMY – YEAR 11

What are your aspirations?

After graduating from Santa Maria College, I hope to further my education and go to University and complete a course that will lead me into the medical field as that is my passion. Since I am doing Biology as a Unit 3&4 subject this year, I hope that I can work hard to receive a score that I will be proud of. I aspire to enter the working field where I can do a job that will help support patients who are undergoing treatment for their illness.

What co-curricular activities do you do?

Since Year 7, I have been actively participating in co-curricular activities both in the Santa environment and also outside of school. Currently, I am part of the Debating team where we work together to create speeches about various topics and debate with many schools that are also part of the Debaters Association of Victoria. Also, I am part of the Social Justice team which enables me to help those who do not have a say in this world. Lastly, I am the Year 11 representative on the SRC which requires me to attend meetings once a week with the other SRC representatives to be the voice of our year level and make changes that have positive impacts on our school.

What do you like most about being a Santa girl?

Being at Santa for 5 years, I have gained so many attributes. I have created new friendships which I will cherish forever and I have been able to showcase my learning in different ways that will put me at benefit. There are so many opportunities that are available to the students which ensures that I will be able to have a successful path after completing school. Every student's opinion is valued and together as one community, everyone works together in making school time valuable.
