

SURIYA ROOST – YEAR 8

What are your aspirations?

My aspirations are design and cooking. Santa Maria College helps me achieve this aspiration by having Design Technology and Food Technology as subjects. The school also has very nice, caring and compassionate teachers who work in these subjects that help me to fulfil this aspiration every single day. Another one of my aspirations is netball. Santa Maria College helps me work on this aspiration by having a netball team that I can try out for. The teachers that coach the netball team know what they're talking about so they will only give me information to improve my game. All in all, no matter what my aspirations, are Santa Maria College will always support me to accomplish them.

What co-curricular activities do you do?

The co-curricular activities I do are netball, dancing, music and debating. I participate in debating and music at the College and netball and dancing outside of school. These activities give me a break from assignments. I also find that joining co-curricular activities at the College helps me meet new friends.

What do you like most about being a Santa girl?

The thing that I like most about being a Santa girl is that I have a lot of opportunities. Whether it be having the chance to learn an instrument or learn a new language, I will always have something to do that I like. This means if I get bored of doing something or just don't want to do it anymore I will always have another opportunity waiting for me, I just have to have the courage to find it.
